Product Information

Oritavancin (phosphate)

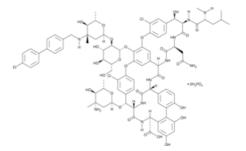

Cat No: 24091 - 5 mg

General Data

Shipping: dry ice

Formulation: A crystalline solid

Purity: ≥98%

Product Overview

Oritavancin is a semisynthetic glycopeptide antibiotic that inhibits the growth of Gram-positive bacteria. $\{39468\}$ It inhibits transglycosylation and transpeptidation in the bacterial cell wall to disrupt membrane integrity. $\{39469,39470\}$ Oritavancin inhibits the growth of clinical isolates from skin and soft-tissue infections, including methicillin-resistant and -susceptible S. aureus (MRSA, MSSA), vancomycin-resistant and -susceptible E. faecium (VREF, VSRF), as well as other staphylococci, streptococci, and enterococci (MIC90s = \leq 0.008-0.5 mg/L). $\{39471\}$ Oritavancin inhibits growth of S. aureus in a neutropenic-mouse thigh model of infection (ED50 = 0.95 mg/kg for a single dose). $\{39472\}$ It improves survival in a mouse inhalation model of B. anthracis Ames anthrax when administered prophylactically pre- and postexposure and when administered post symptom development. $\{39473\}$ Formulations containing oritavancin have been used to treat bacterial skin infections.
