Product Information

Prion Protein Monoclonal Antibody - BAR 236

Cat No: A03224 - 200 µg

Dry Ice Iyophilized IgG with BSA	
Mouse This anti-Prion Protein Monoclonal Antibody was raised	
BAR236	
lgG2a	
Reconstitute the content of the vial in 1 mL of water.	
For western blot analysis of PrPc, dilute to a final concentration of blocking reagent. For EIA and flow cytometry, the optimal workin empirically (currently between 0.1 and 1 µg/mL).	
PrPc (NA*) Hamster, (+) Mouse, (NA*) Bovine, (+) Ovine, (+) Human	l.
	Ivophilized IgG with BSA Mouse This anti-Prion Protein Monoclonal Antibody was raised against an ovine recombinant protein. BAR236 IgG2a Reconstitute the content of the vial in 1 mL of water. For western blot analysis of PrPc, dilute to a final concentration of blocking reagent. For EIA and flow cytometry, the optimal working empirically (currently between 0.1 and 1 μg/mL).

Prion Protein (PrP) and namely its abnormal isoform, partially resistant to proteinase K (PrPres), is the only specific molecular marker of the Transmissible Spongiform Encephalopathies (TSEs) such as Bovine Spongiform Encephalopathie (BSE) or its human form, the New Variant of Creutzfeld-Jakob disease.

This antibody recognises the C-terminal part of the protein but it was not possible to identify a continuous epitope for this antibody.
