

Rolapitant

Cat No: 23906 - 1 mg

General Data

Shipping:	dry ice
Formulation:	A crystalline solid
Purity:	≥98%

Product Overview

Rolapitant is a potent neurokinin-1 (NK1) receptor antagonist ($K_i = 0.66$ nM for the human receptor).{35201} It is greater than 1,000-fold selective for NK1 over NK2 and NK3 and lacks activity in a panel of 100 receptors, transporters, enzymes, and ion channels. Rolapitant inhibits GR-73632-induced calcium efflux in CHO cells expressing human NK1 in a concentration-dependent manner. In vivo, rolapitant inhibits GR-73632-induced foot-tapping in gerbils ($ID_{90} = 0.3$ mg/kg). It also prevents emesis in ferrets induced by apomorphine (Item No. 16094) and cisplatin (Item No. 13119) with ED_{50} values of 0.03 and 0.07 mg/kg, respectively. Formulations containing rolapitant have been used to prevent chemotherapy-induced nausea and vomiting.
