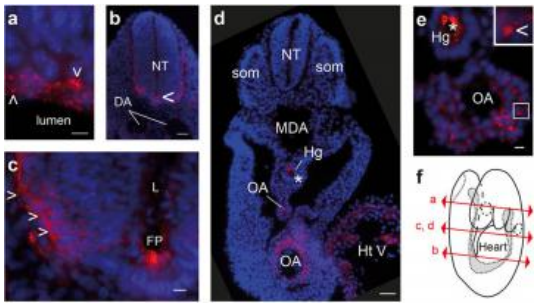
Product Information

Prion Protein Monoclonal Antibody - Sha31

Cat No: A03213 - 200 Âµg



General Data

Shipping: Dry Ice

Formulation: lyophilized IgG with BSA

Host: Mouse

Antigen: This anti-prion protein (PrP) monoclonal antibody was raised against proteinase K treated and non-denatured scrapie-associated fibrils from Syrian hamster infected brain (263K).

Clone: Sha 31

Isotype: IgG1k

Application(s): Reconstitute the content of the vial in 1 mL of water.

For EIA, the optimal working dilution must be determined empirically (currently be-tween 0.1 and 1 µg/mL). For western blot analysis of PrPc, dilute the antibody to a final concentration of 1 µg/mL.

Specificity: PrPc (+), PrPsc (nda) Hamster, (+) Mouse, (nda) Bovine, (+) Ovine, (+) Human.

Product Overview

Prion Protein (PrP) and namely its abnormal isoform, partially resistant to proteinase K (PrPres), is the only specific molecular marker of the Transmissible Spongiform Encephalopathies (TSEs) such as Bovine Spongiform Encephalopathie (BSE) or its human form, the New Variant of Creutzfeld-Jakob disease.
This antibody recognises the human protein sequence within amino acids 145-152 (human numbering).
