

Product Information

Phentermine-d₅ (hydrochloride) (CRM)

Cat No: ISO60199 - 1 mg

General Data

Shipping: dry ice

Formulation: A 1 mg/ml solution in methanol

Special advice: Reference Materials RMs and Certified Reference Materials CRMs are dispatched directly to the end-user in accordance with ISO requirements. Please check regulation status before ordering; additional fees can apply.

Product Overview

Phentermine-d₅ (CRM) is intended for use as an internal standard for the quantification of phentermine (Item No. ISO60198) by GC- or LC-mass spectrometry. Phentermine is an α -methylated amphetamine that activates trace amine associated receptor 1 (TAAR1, EC₅₀ = 5.47 μ M).{29687} It potently stimulates the release of norepinephrine (IC₅₀ = 39.4 nM), with less effect on the release of dopamine and serotonin (IC₅₀s = 262 and 3,511 nM, respectively).{26354} Primarily through these actions, phentermine suppresses appetite and augments fat metabolism, supporting usefulness in ameliorating obesity.{20495,29688}
