

Product Information

XPG (Xeroderma pigmentosum group G) Monoclonal Antibody

Cat No: G01073 - 100 µL

General Data

| | |
|---------------------|---|
| Shipping: | wet ice |
| Formulation: | Liquid Ascite, does not contain any preservative therefore avoid repeat freezing and thawing cycles |
| Host: | Mouse |
| Antigen: | Synthetic peptide |
| Clone: | 1B5 |
| Isotype: | IgG1, κ |

| | |
|------------------------|-------------------------------------|
| Application(s): | ELISA |
| | Western Blot |
| | Immunoprecipitation |
| | Immunocytochemistry |
| | Recommended dilutions: 1/500-1/5000 |

| | |
|---------------------|------------|
| Specificity: | human XPG. |
|---------------------|------------|

Product Overview

ERCC5 or XPG is a single-strand specific DNA endonuclease that makes the 3' incision in DNA excision repair following UV-induced damage. The protein may also function in other cellular processes, including RNA polymerase II transcription, and transcription-coupled DNA repair. Mutations cause xeroderma pigmentosum complementation group G (XP-G), which is also referred to as xeroderma pigmentosum VII (XP7), a skin disorder characterized by hypersensitivity to UV light and increased susceptibility for skin cancer development following UV exposure. Some patients also develop Cockayne syndrome.
