Product Information

Isoxanthopterin

Cat No: 17564 - 10 mg

General Data

Shipping: dry ice

Formulation: A crystalline solid

Purity: ≥90%

$$0 \xrightarrow{N} \xrightarrow{N} \xrightarrow{N} \xrightarrow{N} NH_2$$

Product Overview

Isoxanthopterin is a natural intermediate in the pteridine pathway, which has roles in pigmentation and cell division. {29527} It can be produced naturally from 7-oxobiopterin or in vitro by the oxidation of pterin by xanthine oxidase. {29527,29524} Isoxanthopterin is a guanine analog that interferes with RNA and DNA synthesis and can inhibit cell proliferation. {29523,29526} Methylated derivatives of isoxanthopterin are fluorescent guanine analogs that are used to study DNA structure. {29523,29525}
