Shipping: dry ice

Formulation: A solution in acetonitrile (250 µg/ml of each compound)

Special advice: Reference Materials RMs and Certified Reference Materials CRMs are dispatched directly to the end-user in accordance with ISO requirements. Please check regulation status before ordering; additional fees can apply.

Product Overview

Phytocannabinoid mixture 10 (CRM) (Item No. 21305) is a certified reference material mixture that contains compounds that can be isolated from plants in the genus Cannabis. The mixture is supplied in an amber ampule in which the headspace has been purged with argon. It is designed for use as a reference standard for these major controlled substances during routine analytical checks using HPLC-UV or LC- or GC-MS instrumentation. This product is intended for forensic and research applications. This mixture contains tetrahydrocannabinols, which are regulated as Schedule I compounds in the United States. Included are Δ9-THC, Δ8-THC, tetrahydrocannabinolic acid A, cannabinol, cannabidiol, cannabidiolic acid, (±)-cannabichromene, cannabigerol, cannabigerolic acid, and cannabidivarin.

FP/05/24

For research laboratory use only – Not for human diagnostic use.

Buyers agree to purchase the material subject to Purchasing Terms that can be found on our website. Seek appropriate training to safely handle this product under normal conditions. Use the recommended personal protective equipment to prevent chemical exposures.
