

Biomarker detection: Kits & Reagents

A comprehensive offer of best-in-class analysis tools dedicated to biomarkers

- Commitment to quality & guaranteed performance
- 30 years of know-how in biomarker assays
- A complementary reagent range for streamlined workflows with Bertin health & life sciences

Biomarker detection: Kits & Reagents

Antibodies

- Monoclonal and polyclonal antibodies
- Various host species: rabbit, mouse, sheep, goat...
- Validated for various applications (including ELISA, Western Blot, Immunofluorescence, Immunocytochemistry and Immunohistochemistry)
- Custom labelling available upon request

ELISA kits

- Best-in-class assay kits for life science research labs
- Ready to use components
- Fully validated test
- Strict quality control
- Detailed protocols, including advice on sample preparation
- Possibility of customization (380 wells, bulk packages)
- Possibility of developing on-demand ELISA KIT

Pre-analytical products

- To protect biomarkers during sample collection and preparation steps
- Matching assay kits
- Ready to use
- Customized production on request

Emulsion kits

- Reliable and rapid method to generate injectable antigen or antibody emulsions
- Reproducible high-quality emulsions in only 2 min with the Precellys Instruments
- Avoid wasting expensive reagents
- No risk of accidental exposure or Repetitive Stress Injuries (RSI)

Tissue dissociation kit

- Bead-shearing dissociation: Patented mechanical dissociation using beads, combined with enzymatic dissociation thanks to our in-house mix.
- High viability rate: Over 80% viable cells, crucial for live cell research, ensures reliable results.
- Suitable for various tissues, compatible with multiple methods, flexible and efficient.

Research areas

HYPERTENSION

ENDOCRINOLOGY

INFLAMMATION

PAIN

PRION DISEASES

METABOLIC DISEASES

OXIDATIVE INJURY
